Product Description

AB 1710 44 Three Wheelers BAJAJ RE Suspension Front Shock Absorber

Production:

Front Shock Absorber is one of the main structural parts of the suspension, which mainly performs two functions.

The first function is to act as a damper in the same way as a shock absorber

The second function is different from the shock absorber, which provides structural support for the vehicle's suspension, supports the springs, and keeps the tires in a directional position

In addition, it shares most of the side load on the vehicle's suspension. As a result, front reduction affects ride comfort, handling, vehicle control, braking, steering, wheel alignment, and other suspension wear.

Name	Front Shock Absorber
Part NO.	AB 1710 44
Packing	Box
Model	BAJAJ RE
