Product Description

24 1512 68 Three Wheelers Tricycle BAJAJ RE Brake Shoes

The brake shoes are installed on the fixed brake plate, and the two curved brake shoes form a circle with a diameter slightly smaller than the brake drum and extend into the brake drum. When the brake is pressed, the driving mechanism spreads the circular brake shoe outward, and the brake shoe with high friction performance rubs violently against the inner surface of the brake drum, forcing the rotating brake drum to gradually decelerate until it stops rotating.
