

12V - 80V Voltage Off Road Motorcycle Light Assy LED Headlamp Spot Light

Our Product Introduction

Basic Information

- Place of Origin: Guangdong, China
- Brand Name: WAY-C
- Model Number: Universal
- Minimum Order Quantity: 50sets
- Price: \$21.00/sets 50-199 sets
- Packaging Details: CARTON
- Delivery Time: 30-45days
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 10000 Bag/Bags per Month

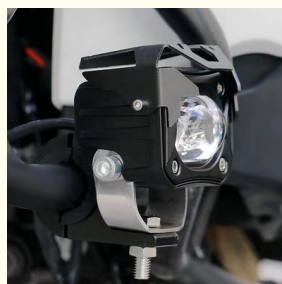

Product Specification

- Warranty: Support
- Product Name: LED Spot Light
- Material: LED + CNC
- Voltage: 12V-80V
- MOQ: 50pair
- Quality: High-Quality
- Packing: Box
- SHIPPING: Sea Transport.Air Transport Air Express
- Port: Guangzhou,china
- Highlight: 80V Light Assy, 12V Motorcycle LED Spot Light, Off Road Motorcycle LED Headlamp

Off Road Motorcycle LED Head Lamp Spot Light 12-80V Headlight Spotlight

Products Description

Product name	Headlight Spotlight
Model	Universal
Materials	LED+CNC
Voltage	12-80V
Packing	BOX
Shipping	Sea/Air
Place of origin	Guangzhou,China

Many people like to ride motorcycles because they are more convenient to ride than cars, and some motorcycles also look very cool. But many people install spotlights on their motorcycles, and there are many reasons why these riders install spotlights on their motorcycles. But generally speaking, there is only one reason why regular riders install spotlights on their motorcycles, and that is to make up for the weak lighting of the motorcycle.

There are many models that use low-brightness, low-wattage halogen headlights. Although many models now use LED lights, after all, these types of cars are still in the minority, so there are many riders who use them on their own. On the motorcycles, spotlights will be installed later. And from the perspective of the riding environment, there is a big difference between riding a motorcycle and a car. The lights of a car are generally divided into fluorescent lights, nightlight lights, and fog lights. However, motorcycles do not have this kind of light setting, so at night, the rider needs to pay a lot of attention to distinguish the situation on the road, which also poses a huge safety risk to the rider while riding of.

If you want to retrofit high-brightness headlights on a motorcycle, you must consider the expansion of the motorcycle's battery and the wiring on the body, and the position of the headlights also needs to be redesigned because this takes into account the

heat dissipation of the headlights. . And unlike halogen lights, when adding headlights to a motorcycle, you also need to consider a series of operations such as lenses and stabilized gases, which will increase the cost a lot.

When installing spotlights, you must also consider a series of safety issues of motorcycles, such as the risk of overloading the circuit and burning the vehicle, or the battery being easily burned out. However, if it is not installed, it is very easy to cause a traffic accident if you cannot see some problems on the road clearly when driving at night. Therefore, many riders are very willing to install spotlights on their motorcycles later. After all, if the lights in front of the motorcycle are not bright enough, it will be very unsafe when riding at night. Therefore, many riders install spotlights on their motorcycles in order to ride better and safer.
