Products Description

Product name	Motorcycle Spare Parts
Model	TVS ROCKZ 125
Materials	OEM
Size	OEM
Packing	Box
Shipping	Sea/Air
Place of origin	Guangzhou,China

When it comes to motorcycle spare parts for the TVS ROCKZ 125, here are some common components that you might be interested in:

Brake Pads: Brake pads are an essential part of the braking system. They create friction against the brake disc to slow down or stop the motorcycle. It is important to periodically check and replace brake pads to ensure optimal braking performance.

Spark Plugs: Spark plugs are responsible for igniting the fuel mixture in the combustion chamber. Over time, spark plugs can become worn or fouled, leading to poor engine performance. Regularly inspecting and replacing spark plugs is crucial for maintaining smooth engine operation.

Air Filter: The air filter prevents dust, dirt, and debris from entering the engine. A clogged or dirty air filter can restrict airflow, affecting engine performance and fuel efficiency. Regularly cleaning or replacing the air filter is necessary to ensure proper air intake.

Chain and Sprocket Kit: The chain and sprocket kit transfers power from the engine to the rear wheel. Over time, chains can stretch or become worn, while sprockets can wear out or develop teeth damage. Replacing the chain and sprocket kit at recommended intervals helps maintain smooth power transmission.

Clutch Plates: The clutch plates are responsible for engaging and disengaging the power from the engine to the transmission. Worn or damaged clutch plates can cause slipping or difficulty in shifting gears. Regular inspection and replacement of clutch plates can ensure smooth clutch operation.
