Model	TVS ROCKZ 125
Materials	Glass
Parts NO	R1220640/R1220630
Packing	Box
Shipping	Sea/Air
Place of origin	Guangzhou,China

The TVS ROCKZ 125 motorcycle is typically equipped with side mirrors, which are essential for providing visibility and enhancing safety while riding. However, I don't have access to specific information about the side mirror model for the TVS ROCKZ 125. Here is some general information about motorcycle side mirrors:

Function: Motorcycle side mirrors, also known as rearview mirrors, allow the rider to see what's behind them without turning their head. They provide a clear view of the road behind, helping the rider to monitor traffic and make informed decisions while changing lanes, turning, or maneuvering.

Design: Motorcycle side mirrors usually consist of a mirror housing and a reflective surface. The mirror housing is typically made of plastic or metal, and it is designed to be mounted on the handlebars or fairing of the motorcycle. The reflective surface is typically made of glass or acrylic and is positioned within the housing to provide the rider with a clear rearward view.

Adjustment: Side mirrors can usually be adjusted to suit the rider's preference and improve rear visibility. They can be tilted, rotated, or extended to achieve the desired viewing angle.

Safety Considerations: It is important to regularly check and maintain motorcycle side mirrors to ensure they are properly adjusted and secure. Loose or damaged mirrors should be repaired or replaced promptly to maintain optimal visibility and safety on the road.

For specific details about the side mirror model used in the TVS ROCKZ 125 motorcycle, I recommend referring to the official TVS documentation, contacting authorized TVS dealers or service centers, or reaching out to TVS customer support for accurate and up-to-date information.
