N8090400 Motorcycle Moto Rear Shock Absorber Assy For TVS STAR HLX100

Our Product Introduction

for more products please visit us on waycmoto.com

Basic Information

- Place of Origin: Guangdong, China
- Brand Name: WAY-C
- Model Number: TVS STAR HLX100
- Minimum Order Quantity: 50 pieces
- Price: \$7.00/pieces 12-99 pieces
- Packaging Details: Box+CARTON
- Delivery Time: 30-45days
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 20000 Piece/Pieces per Month

Product Specification

- Model: TVS STAR HLX100
- Product Name: Rear Shock Absorber
- MOQ: 30 PCS
- Material: Steel
- Quality: High Qaulity
- Shipping: Sea Transport.Air Transport Air Express
- Port: NANSHA/HUANGPU, GUANGZHOU
- Parts NO: N8090400
- Highlight: Moto Shock Absorber Assy,
N8090400 Shock Absorber Assy,
Motorcycle Rear Shock Absorber

Product Description

N8090400 Motorcycle Rear Shock Absorber Assy for TVS STAR HLX100

Products Description

Product name	Rear Shock Absorber
Model	TVS STAR HLX100
Materials	Steel
Parts NO	N8090400
Packing	Box
Shipping	Sea/Air
Place of origin	Guangzhou,China

The TVS STAR HLX100 motorcycle is typically equipped with a rear shock absorber, also known as a rear suspension. However, I don't have access to specific information about the rear shock absorber model for the TVS STAR HLX100. Here is some general information about motorcycle rear shock absorbers:

Function: Rear shock absorbers are an integral part of the motorcycle's suspension system. They are designed to absorb and dampen the shocks and vibrations generated by uneven road surfaces. The primary function of the rear shock absorber is to provide stability, control, and a comfortable ride by minimizing the impact of bumps and road irregularities.

Design: Rear shock absorbers consist of a spring and a damper. The spring absorbs the energy of the impact by compressing and then releases it, while the damper dissipates the energy by controlling the speed of the spring's movement. This combination of spring and damper helps to maintain contact between the rear wheel and the road surface, ensuring traction and stability.

Adjustment: Some rear shock absorbers offer adjustability to fine-tune the suspension based on rider preferences and varying road conditions. Adjustments can include preload (to account for rider weight and load), damping (to control the rate of compression and rebound), and rebound (to control how quickly the shock returns to its original position).

Maintenance: Regular maintenance of the rear shock absorber is important to ensure optimal performance. This may include checking for leaks, inspecting the condition of the spring and damper, and lubricating moving parts as necessary. If the rear shock absorber is damaged or worn out, it should be replaced to maintain safe and effective suspension performance.

For specific details about the rear shock absorber model used in the TVS STAR HLX100 motorcycle, I recommend referring to the official TVS documentation, contacting authorized TVS dealers or service centers, or reaching out to TVS customer support for accurate and up-to-date information.

Why Choose Us

OUR ADVANTAGES

GUANGZHOU WAY-C TRADING CO.,LTD.

Why choose us?

- ◆ 1. High quality: Using high quality material and establishing a strict quality control system, assigning specific persons in charge of each part of production, from raw material purchase to assembly.
- ◆ 2. Professional models for motorcycle parts and three wheeler parts , we have one group to focus on the new models parts , so welcome to OEM and ODM orders
- ◆ 3. Fast dispatch: Most of the products are in stock. Quality below 100pcs can be delivered within 15 days.
- ◆ 4. Small order accepted: Low MOQ accepted. 50pcs are available.
