H1410 00 Motobike Magneto Coil Stator Assy For YAMAHA FZ16

Our Product Introduction

Basic Information

- Place of Origin: Guangdong, China
- Brand Name: WAY-C
- Model Number: YAMAHA FZ16
- Minimum Order Quantity: 100 pieces
- Price: \$5.00/pieces 100-990 pieces
- Packaging Details: Box+CARTON
- Delivery Time: 30-45days
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 20000 Piece/Pieces per Month

Product Specification

- Model: YAMAHA FZ16
- Product Name: Magneto Coil
- MOQ: 100PCS
- Material: Copper
- Quality: High Qaulity
- Shipping: Sea Transport.Air Transport Air Express
- Port: NANSHA/HUANGPU, GUANGZHOU
- Parts NO: H1410 00
- Highlight: **Motobike Magneto Coil, H1410 00 Magneto Coil**

Product Description

H1410 00 Motorcycle Magneto Coil Stator Assy YAMAHA FZ16

Products Description

Product name	Stator Assy
Model	YAMAHA FZ16
Materials	Copper
Parts NO	H1410 00
Packing	Box
Shipping	Sea/Air
Place of origin	Guangzhou,China

The motorcycle magneto coil is mainly composed of a trigger coil, a magneto coil and an ignition coil

This type of magneto coil generally has five wires

The four wires are the yellow wire and the pink wire, the blue and white wire and the green and white wire, which are the charging coil wire and the trigger coil wire, respectively.

1. The black red line is the ignition coil, and the connecting wire is directly connected to the igniter.
2. The blue and white wire and the green and white wire are the trigger coils, and the connecting wires are also directly connected to the igniter.
3. The yellow wire and pink red wire are connected to the charging coil, and the wire is directly connected to the rectifier regulator.

Under normal circumstances, the color of the motorcycle line is basically unified, but individual brand models may have slightly different colors, so the connection can not be blindly connected to each other with the same color, and the characteristics of the connecting wires must be clarified in order to connect with each other, otherwise it is easy to damage other electrical components.

The coil in a circuit refers to an inductor. The guide wires are wound one by one, and the wires are insulated from each other, while the insulating tube can be hollow, or it can contain an iron core or a magnetic powder core, referred to as an inductor. Inductance can be divided into fixed inductance and variable inductance, and fixed inductance coils are referred to as inductors or coils. Expressed in L, the units are henry (H), millihenry (mH), microhenry (uH), $1\text{H} = 10^3\text{mH} = 10^6\text{uH}$.

Please choose WAY-C to ensure that the generator stator assembly purchased meets the standards and specifications.

PACKING & SHIPPING

GUANGZHOU WAY-C TRADING CO.,LTD.

Why Choose Us

OUR ADVANTAGES

GUANGZHOU WAY-C TRADING CO.,LTD.

Why choose us?

- ◆ 1. High quality: Using high quality material and establishing a strict quality control system, assigning specific persons in charge of each part of production, from raw material purchase to assembly.
- ◆ 2. Professional models for motorcycle parts and three wheeler parts , we have one group to focus on the new models parts , so welcome to OEM and ODM orders
- ◆ 3. Fast dispatch: Most of the products are in stock. Quality below 100pcs can be delivered within 15 days.
- ◆ 4. Small order accepted: Low MOQ accepted. 50pcs are available.
