Product Description

12V35W Motorcycle Headlight Bulb H4 Halogen bulbs Motor Light

Products Description

Product name	Headlight Bulb
Model	H4
Materials	Halogen
Power	12V35W
Packing	Box
Shipping	Sea/Air
Place of origin	Guangzhou,China

The H4 12V35W is a common motorcycle headlight bulb model that typically uses halogen bulb technology. Power and Voltage: H4 12V35W means that the bulb has a power of 35 watts and a voltage of 12 volts.

These specifications refer to the bulb's operating wattage and required voltage. Halogen bulb: H4 12V35W bulb belongs to the halogen bulb type.

Halogen light bulbs use halogen elements such as bromine or iodine to enhance the brightness and longevity of the bulb.

They provide a relatively high lighting effect and provide good visibility while the motorcycle is in motion.

Replacement and Installation: Replacing the H4 12V35W halogen bulb is relatively simple.

Typically, you'll need to open the headlight housing, find and unscrew the nut that holds the bulb in place, then insert the new bulb and reattach the nut.

Be sure to turn off the power to your motorcycle before replacing the bulb to avoid touching high-voltage wires.
