

## N6320390 Aluminium Motorcycle Engine Parts Piston Kit With Ring For TVS STAR HLX

Our Product Introduction

### Basic Information

- Place of Origin: Guangdong, China
- Brand Name: WAY-C
- Model Number: TVS STAR HLX
- Minimum Order Quantity: 200 pieces
- Price: \$8.00/pieces 200-1000 pieces
- Packaging Details: Box+Carton
- Delivery Time: 30-45days
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 200000 Piece/Pieces per Month

### Product Specification

- Model: TVS STAR HLX
- Product Name: Piston Kit
- MOQ: 200 PCS
- Material: Aluminium
- Quality: High Qaulity
- Shipping: Sea Transport.Air Transport Air Express
- Port: NANSHA/HUANGPU, GUANGZHOU
- Parts NO: N6320390
- Highlight: **N6320390 Motorcycle Engine Parts, Aluminium Motorcycle Engine Parts, Alluminium Motorcycle Piston Kit**

## Product Description

### N6320390 Motorcycle Engine Parts Piston Kit With Ring For TVS STAR HLX

#### Products Description

Product name	Piston kit
Model	TVS STAR HLX
Materials	Alluminium
Parts NO	N6320390
Packing	Box
Shipping	Sea/Air
Place of origin	Guangzhou,China

The motorcycle piston kit consists of several key components:

**Piston Crown:** The piston crown is the top part of the piston that is exposed to the combustion chamber. It often has a specific shape and features to help create the combustion chamber and guide the expansion and compression of the combustion gases.

**Piston Rod:** The piston rod is the component that connects the piston crown to the connecting rod. It transfers the motion of the piston crown to the connecting rod, converting the piston's linear reciprocating motion into the rotational motion of the connecting rod.

**Wrist Pin (or Piston Pin):** The wrist pin is a small pin that connects the piston rod and the piston. It allows the piston rod to rotate freely within the piston pin bore while maintaining the connection between the piston rod and the piston.

**Piston Rings:** Piston rings are ring-shaped seals installed on the piston. They typically include compression rings and oil control rings. The compression rings seal the combustion chamber, preventing leakage of the combustion gases, while the oil control rings control the consumption of lubricating oil and help return oil to the oil sump.
