

62100H2C000H504 Suspension Motorcycle Shock Absorber For HAOJUE KA125 KA150

Our Product Introduction

Basic Information

- Place of Origin: Guangdong, China
- Brand Name: WAY-C
- Model Number: HAOJUE KA125 KA150
- Minimum Order Quantity: 60 Set
- Price: \$2.00/pieces 36-1000 pieces
- Packaging Details: Box+Carton
- Delivery Time: 30-45days
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 200000 Piece/Pieces per Month

Product Specification

- Model: HAOJUE KA125 KA150
- Product Name: Rear Shock Absorber
- MOQ: 50 PCS
- Material: Alloy
- Quality: High Qaulity
- Shipping: Sea Transport.Air Transport Air Express
- Port: NANSHA/HUANGPU, GUANGZHOU
- Parts NO: 62100H2C000H504
- Highlight: Suspension Motorcycle Shock Absorber, 62100H2C000H504 Motorcycle Shock Absorber

Product Description

62100H2C000H504 HAOJUE KA125 KA150 Motorcycle Suspension Rear Shock Absorber

Products Description

Product name	Starter Motor
Model	HAOJUE KA125 KA150
Parts NO	62100H2C000H504
Packing	Box
Shipping	Sea/Air
Place of origin	Guangzhou,China

A motorcycle rear shock absorber is a device used to reduce shock and vibration to the rear suspension system during motorcycle riding. It acts to absorb and regulate impact forces from road irregularities, bumps or jumps, providing a smoother and more comfortable ride.

The rear shock absorber usually consists of a pneumatic shock absorber or a hydraulic shock absorber, which absorbs impact by compressing gas or liquid, and uses a damping adjuster to control the speed and amplitude of shock absorption.

The main components of the rear shock absorber include:

Shock-absorbing spring: It is responsible for supporting and restoring the rear suspension system, absorbing and dispersing energy when encountering impacts.

Shock Absorber Cylinder: The main part that houses the shock absorber, usually a pneumatic shock absorber or a hydraulic shock absorber.

Damping adjuster: Controls the speed and amplitude of shock absorption by adjusting the damping force inside the shock absorber.

Adjustments: Some rear shocks are adjustable, allowing the rider to tailor the damping to road conditions or personal preference.

The design and adjustment of the rear shock absorber is crucial to the suspension performance and ride comfort of a motorcycle.
