Model	SUZUKI GIXXER SF GXS
Parts NO	94443-34J00-PGZ
Packing	Box
Shipping	Sea/Air
Place of origin	Guangzhou,China

A motorcycle cowling side lower is an appearance piece installed on the front of a motorcycle, usually made of plastic. Its main function is to improve the aerodynamic performance of the motorcycle, provide protection and improve riding comfort.

The functions of motorcycle cowling side lower include:

Aerodynamic improvement: The cowling side lower is designed to reduce wind resistance, optimize airflow streamlines, and reduce the aerodynamic resistance of the motorcycle when traveling at high speeds. By reducing resistance to airflow, fairings can improve a motorcycle's stability, handling and fuel efficiency.

Protection and protection: The cowling side lower can provide protection for the rider's body, keeping wind, rain, mud and debris away from the rider, providing better protection and safety. It reduces the impact of wind and prevents splash from hitting the rider, while also reducing wind noise and wind discomfort.

Appearance beautification: cowling side lower can give a motorcycle a unique appearance and personality.
