N9323681 Motorcycle Con Rod Kit Connecting Rod Kit For TVS APACHE RTR

Our Product Introduction

Basic Information

- Place of Origin: Guangdong, China
- Brand Name: WAY-C
- Model Number: TVS APACHE RTR
- Minimum Order Quantity: 100 pieces
- Price: \$7.00/pieces 100-990 pieces
- Packaging Details: Box+CARTON
- Delivery Time: 30-45days
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 20000 Piece/Pieces per Month

Product Specification

- Model: TVS APACHE RTR
- Product Name: Connecting Rod
- MOQ: 100SET
- Material: Iron
- Quality: High Qaulity
- Shipping: Sea Transport.Air Transport Air Express
- Port: NANSHA/HUANGPU, GUANGZHOU
- Parts NO: N9323681
- Highlight: **N9323681 Con Rod Kit, Motorcycle Con Rod Kit, Motorcycle Connecting Rod Kit**

Product Description

N9323681 Motorcycle parts Connecting Rod for TVS APACHE RTR

Products Description

Product name	Connecting Rod
Model	TVS APACHE RTR
Materials	Iron
Parts NO	N9323681
Packing	Box
Shipping	Sea/Air
Place of origin	Guangzhou,China

WAY-C

Motorcycle connecting rods are an important part of connecting the engine crankshaft and pistons. It is also known as a connecting rod assembly or connecting rod assembly. The main function of the connecting rod is to convert the rotational motion of the crankshaft into reciprocating linear motion and transmit power to the pistons to drive the wheels of the motorcycle.

Motorcycle connecting rods are usually made of high-strength metal materials, such as steel alloys or aluminum alloys. It has a small end connected to the crankshaft and a large end connected to the piston. The small end is connected to the crankshaft through pins or bolts, and the big end is connected to the piston through pins or sliding bearings.

When the engine is running, the rotational motion of the crankshaft is transmitted to the small end of the connecting rod, causing the connecting rod to swing. This creates reciprocating linear motion between the big end of the connecting rod and the piston. The reciprocating motion of the piston in the cylinder produces cylinder compression and explosion impact, which drives the crankshaft to rotate and further transmits power to the motorcycle's transmission system, thereby driving the wheels to rotate.

Motorcycle connecting rod designs and specifications will vary based on different engine types and motorcycle applications. High-performance motorcycles often require stronger and more durable connecting rods to handle higher power and rpm. In addition, the weight and balance of the connecting rod also have an important impact on the balance and vibration control of the engine.

Motorcycle connecting rods bear tremendous force and pressure during engine operation, so it is important to regularly check and maintain the condition of the connecting rods. If the connecting rod is damaged, deformed or worn, it may result in reduced engine performance or even serious failure.

PACKING & SHIPPING

Why Choose Us

OUR ADVANTAGES

GUANGZHOU WAY-C TRADING CO.,LTD.

Why choose us?

- ◆ 1. High quality: Using high quality material and establishing a strict quality control system, assigning specific persons in charge of each part of production, from raw material purchase to assembly.
- ◆ 2. Professional models for motorcycle parts and three wheeler parts, we have one group to focus on the new models parts, so welcome to OEM and ODM orders
- ◆ 3. Fast dispatch: Most of the products are in stock. Quality below 100pcs can be delivered within 15 days.
- ◆ 4. Small order accepted: Low MOQ accepted. 50pcs are available.
