

## HAOJUE KA125/KA150 Steel Motorcycle Crash Guard 94210H2C000H000

Our Product Introduction

### Basic Information

- Place of Origin: Guangdong, China
- Brand Name: WAY-C
- Model Number: HAOJUE KA125/KA150
- Minimum Order Quantity: 100 pieces
- Price: \$12.00/pieces 100-990 pieces
- Packaging Details: Box+CARTON
- Delivery Time: 30-45days
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 20000 Piece/Pieces per Month

### Product Specification

- Model: HAOJUE KA125/KA150
- Product Name: Crash Guard
- MOQ: 20SET
- Material: Steel
- Quality: High Qaulity
- Shipping: Sea Transport.Air Transport Air Express
- Port: NANSHA/HUANGPU, GUANGZHOU
- Parts NO: 94210H2C000H000
- Highlight: Steel Motorcycle Crash Guard,  
Motorcycle Crash Guard 94210H2C000H000

## Product Description

### 94210H2C000H000 HAOJUE KA125/KA150 Motorcycle Crash Guard

#### Products Description

Product name	Crash Guard
Model	KA125/KA150
Materials	Steel
Parts NO	94210H2C000H000
Packing	Box
Shipping	Sea/Air
Place of origin	Guangzhou,China

Motorcycle guard bars refer to protective devices installed on the front and sides of motorcycles to reduce damage to the vehicle and rider in the event of a collision or dumping.

Guard bars are usually made of solid metal material and are installed on the front and sides of the motorcycle frame. They are designed to provide extra protection, especially in the event of a low-speed collision, tipping, or accidental loss of balance while parking.

The main functions of guardrails include:

**Protect the vehicle:** Guardrails can absorb and disperse the impact during a collision or dumping, reducing damage to vehicle components. They can protect key parts such as the front, body and rear of the car, reducing repair costs.

**Protect the rider:** The presence of guard bars can provide additional protection to the rider and reduce the possibility of injury. When tipping over, guard bars prevent the vehicle from directly contacting the ground, reducing the risk of injury to the rider. In addition, in some cases, the guard bars can also serve as support points for the pedals to help the rider maintain balance.

**Adds Look and Style:** Guardrails can also improve the appearance of your motorcycle and add a personalized touch to the vehicle.

It's important to note that bumpers don't completely eliminate all damage from a collision or rollover, especially in a high-speed collision or serious accident. In addition, guardrails should be designed and installed in such a way that they do not

interfere with vehicle operation and handling.

In summary, a motorcycle guard is a protective device mounted on the front and sides designed to mitigate damage to the vehicle and rider in the event of a collision or rollover. They provide extra protection and security and add appearance and personal touch to the motorcycle.
