## AA101864 Tricycle TUKTUK KEKE Moto Spare Parts Camshaft Cam Shaft For BAJAJ RE

Our Product Introduction

for more products please visit us on [waycmoto.com](http://waycmoto.com)

### Basic Information

- Place of Origin: Guangdong, China
- Brand Name: WAY-C
- Model Number: BAJAJ
- Minimum Order Quantity: 200 pieces
- Price: \$4.00/pieces 200-990 pieces
- Packaging Details: Box+CARTON
- Delivery Time: 30-45days
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 20000 Piece/Pieces per Month

### Product Specification

- Model: BAJAJ
- Product Name: Cam Shaft
- MOQ: 200PCS
- Material: Iron
- Quality: High Qaulity
- Shipping: Sea Transport.Air Transport Air Express
- Port: NANSHA/HUANGPU, GUANGZHOU
- Parts NO: AA101864
- Highlight: AA101864 Moto Spare Parts,  
KEKE Spare Parts Camshaft,  
TUKTUK Spare Parts Camshaft

## Product Description

### AA101864 Tricycle TUKTUK KEKE Moto Spare Parts Camshaft Cam Shaft for BAJAJ RE

#### Products Description

Product name	Cam Shaft
Model	BAJAJ
Materials	Iron
Parts NO	AA101864
Packing	Box
Shipping	Sea/Air
Place of origin	Guangzhou,China

The camshaft of a tricycle is one of the key components of the engine. It is responsible for controlling the opening and closing timing of the engine valve. The camshaft is usually located on the cylinder head of the engine and is connected to the crankshaft through gear transmission.

There are a series of raised cams on the camshaft, each cam corresponding to a valve. As the camshaft rotates, the shape of the cam pushes its corresponding valve, causing it to open or close. In this way, by controlling the camshaft, timely valve opening and closing can be achieved, thereby controlling the timing of gas entering and exiting the cylinder.

In addition to the engine, it also uses variable camshaft technology. A variable camshaft adjusts the shape or phase of the cam according to engine operating conditions and load requirements to optimize combustion efficiency and power output.

In general, the camshaft plays a vital role in the operation of the engine. Its design and control directly affect the performance and combustion efficiency of the engine. Different models of tricycles may use camshafts of different designs to accommodate different power requirements and performance needs.
