Product Description

Racing Bike Motorcycle Modified Parts Rubber Handle Grips

Products Description

Product name	Handle Grips
Model	Universal
Materials	CNC
Parts NO	OEM
Packing	Box
Shipping	Sea/Air
Place of origin	Guangzhou,China

Motorcycle Handlebar Grip is a rubber cover used to provide a comfortable grip and anti-slip function. It is mounted on the handlebars of the motorcycle to provide the rider with a good grip surface and reduce the impact of vibration on the hands.

Material: Motorcycle handlebar glue is usually made of rubber or silicone. Rubber handle glue has good anti-slip properties and a comfortable grip, while silicone handle glue is softer and provides better shock absorption.

Designs and Textures: Grip glue is available in a variety of designs and textures to suit different preferences and styles. Some handle glues are textured, bumpy or patterned to provide better slip resistance and grip.

Installation and replacement: Handlebar glue is usually removable and can be installed and replaced relatively easily. Appropriate tools and lubricants can be used to help install the handlebar glue.

Maintenance and maintenance: Regularly check the handle rubber for wear and damage and replace it in time. If the handle glue is cracked, worn or deformed, it may affect your grip and safety. In addition, regular cleaning of the handle glue will maintain its appearance and performance.
