WAY-C

Motorcycle Instrument Cluster is a display device installed on a motorcycle to provide information and data related to the rider and the vehicle. It is usually located at the front of the vehicle, and the rider can obtain key vehicle status and driving information by observing the instrument.

The digital display on the instrument usually displays information such as speed, rpm, mileage and so on digitally, while the analogue instrument uses pointers and dials to display the corresponding data.

Display information: Motorcycle instruments can provide a variety of information and data, including but not limited to the following: Speed: current speed Speed: engine speed Mileage: mileage traveled or fuel consumption Fuel quantity: Remaining amount of fuel Warning indication: such as low battery, engine failure, etc. Turn signal indicator: Indicates whether the turn signal is on.
