Product Description

JV 3512 13 Motorcycle CDI Igniter Assy for BAJAJ BOXER X125

Products Description

Product name	CDI
Model	BAJAJ BOXER X125
Materials	Plastic
Parts NO	JV 3512 13
Packing	Box
Shipping	Sea/Air
Place of origin	Guangzhou,China

BOXER 125

The motorcycle ignition system (Ignition System) of BAJAJ BOXER X125 is a key component used to ignite the mixed gas and start the engine. It provides a high-voltage current to ignite the gasoline/air mixture, allowing the engine to operate properly.

Electronic ignition system: The electronic ignition system uses an electronic control unit (ECU) and sensors to electronically control ignition timing and ignition energy. This type of system is more accurate and reliable and usually does not require frequent adjustments and maintenance.

Motorcycle igniters are more modern in design and performance, with electronic ignition systems, and they offer better performance, reliability, and fuel economy.
