Motorcycle Piston Ring Set STD For HAOJUE XPRESS 12111H3H000H000

Our Product Introduction

Basic Information

- Place of Origin: Guangdong, China
- Brand Name: WAY-C
- Model Number: HAOJUE XPRESS
- Minimum Order Quantity: 200 pieces
- Price: \$3.00/pieces 100-990 pieces
- Packaging Details: Box+CARTON
- Delivery Time: 30-45days
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 20000 Piece/Pieces per Month

Product Specification

- Model: HAOJUE XPRESS
- Product Name: Piston Kit
- MOQ: 200PCS
- Material: Alloy
- Quality: High Quality
- Shipping: Sea Transport.Air Transport Air Express
- Port: NANSHA/HUANGPU, GUANGZHOU
- Parts NO: 12111H3H000H000
- Highlight: **Motorcycle Piston Ring Set,
Moto Piston Ring Set, 12111H3H000H000**

Product Description

12111H3H000H000 Motorcycle Piston Ring Set STD for HAOJUE XPRESS

Products Description

Product name	Motorcycle piston kit
Model	HAOJUE XPRESS
Materials	Alloy
Parts NO	12111H3H000H000
Packing	Box
Shipping	Sea/Air
Place of origin	Guangzhou,China

The motorcycle piston is one of the key components of the engine. It is located in the engine cylinder and connected to the crankshaft. The piston reciprocates up and down during engine operation, generating power by compressing the mixture or combustion gases.

Motorcycle pistons are usually made of high-strength aluminum alloy materials to ensure their lightweight and durability. There is a raised part on the top of the piston, called the piston crown, which forms a sealed space with the cylinder. The piston also has one or more annular grooves for installing piston rings to ensure sealing between the cylinder wall and the piston.

The working process of motorcycle piston is as follows: Suction stroke:

When the piston moves downward, the valves in the cylinder open, allowing mixture or combustion gases to enter the cylinder. Compression stroke: When the piston moves upward, the valve closes, compressing the mixture or combustion gas, increasing its pressure and temperature. Explosive stroke: When the piston reaches its highest point, the ignition system triggers the spark plug to generate sparks, igniting the mixture or combustion gases, thereby generating an explosive force to push the piston downward. Exhaust stroke: When the piston moves upward again, the exhaust valve opens and exhausts the exhaust gases produced by combustion out of the cylinder.

Why Choose Us

OUR ADVANTAGES

GUANGZHOU WAY-C TRADING CO.,LTD.

Why choose us?

- ◆ 1. High quality: Using high quality material and establishing a strict quality control system, assigning specific persons in charge of each part of production, from raw material purchase to assembly.
- ◆ 2. Professional models for motorcycle parts and three wheeler parts, we have one group to focus on the new models parts, so welcome to OEM and ODM orders
- ◆ 3. Fast dispatch: Most of the products are in stock. Quality below 100pcs can be delivered within 15 days.
- ◆ 4. Small order accepted: Low MOQ accepted. 50pcs are available.
