Product Description

R1170070 Motorcycle Cable Clutch Brake Cables for TVS NEO 110

Products Description

Product name	Motorcycle Cable
Model	TVS NEO 110
Materials	Copper
Parts NO	R1170070
Packing	Box
Shipping	Sea/Air
Place of origin	Guangzhou,China

WAY-C

Motorcycle cables are an essential part of the control system on motorcycles. They transmit mechanical forces from the controls (such as the throttle cable, clutch cable, brakes cable, choke cable and speed cable) to the corresponding components on the motorcycle, allowing the rider to operate and control the bike effectively. Here are some commonly used motorcycle cables:

Throttle Cable: The throttle cable connects the throttle grip to the carburetor or throttle body.

Clutch Cable: The clutch cable connects the clutch lever to the clutch mechanism.

Brake Cables: Motorcycles can have different types of brake cables depending on the braking system.

Choke Cable: Older motorcycles or those with carburetors may have a choke cable.

Speedometer Cable: Some motorcycles use mechanical speedometers that are driven by a speedometer cable.
