Model	BAJAJ PULSAR 180
Materials	Plastic
Parts NO	DK 2010 03
Packing	Box
Shipping	Sea/Air
Place of origin	Guangzhou,China

A motorcycle LED tail lamp, also known as a LED taillight or brake light, is a lighting component located at the rear of a motorcycle. It serves multiple functions, including improving visibility and safety by indicating the motorcycle's presence, signaling braking or deceleration, and illuminating the rear of the bike for other motorists to see.

LED (Light Emitting Diode) technology is commonly used in modern motorcycle tail lamps due to its numerous advantages over traditional incandescent bulbs.
