## Product Description

### G4320780 Tricycle TUKTUK Engine Valve kit Intake Exhaust Val for TVS KING

#### Products Description

Product name	Motorcycle Engine Valve kit
Model	TVS KING
Materials	Alloy
Parts NO	G4320780
Packing	Box
Shipping	Sea/Air
Place of origin	Guangzhou,China

TVS KING Motorcycle engine valve kit typically refers to a set of components that includes intake valves, exhaust valves, valve springs, valve retainers, valve keepers, and valve seals. These components are essential for the proper functioning of the engine's intake and exhaust processes.

**Intake Valves:** Intake valves are responsible for allowing the intake of fresh air and fuel mixture into the combustion chamber. They open and close at specific times in sync with the engine's operation, controlled by the camshaft(s). Intake valves are subjected to high temperatures and must have good heat dissipation properties.

**Exhaust Valves:** Exhaust valves are responsible for expelling the burned exhaust gases from the combustion chamber. Similar to intake valves, they open and close at specific times in sync with the engine's operation. Exhaust valves are also exposed to high temperatures and must be able to withstand the corrosive effects of the hot exhaust gases.

**Valve Seals:** Valve seals are small rubber or silicone components that fit around the valve stems.
