Product Description

M1010550/M1010560 Motorcycle Engine Valve kit Intake Exhaust Val for TVS HLX125

Products Description

Product name	Motorcycle Engine Valve kit
Model	TVS HLX125
Materials	Alloy
Parts NO	M1010550/M1010560
Packing	Box
Shipping	Sea/Air
Place of origin	Guangzhou,China

TVS HLX125 Motorcycle engine valve kit typically refers to a set of components that includes intake valves, exhaust valves, valve springs, valve retainers, valve keepers, and valve seals. These components are essential for the proper functioning of the engine's intake and exhaust processes.

Intake Valves: Intake valves are responsible for allowing the intake of fresh air and fuel mixture into the combustion chamber. Intake valves are subjected to high temperatures and must have good heat dissipation properties.

Exhaust Valves: Exhaust valves are responsible for expelling the burned exhaust gases from the combustion chamber. Similar to intake valves, Exhaust valves are also exposed to high temperatures and must be able to withstand the corrosive effects of the hot exhaust gases.

Valve Seals: Valve seals are small rubber components that fit around the valve stems.
