## Product Description

### AA 1015 98 Tricycle TUKTUK Moto Clutch Assembly for BAJAJ RE

#### Products Description

Product name	Clutch Assembly
Model	BAJAJ RE
Materials	Alloy
Parts NO	AA 1015 98
Packing	Box
Shipping	Sea/Air
Place of origin	Guangzhou,China

The tricycle clutch assembly is a component that enables the engagement and disengagement of power between the engine and the drivetrain of a tricycle. The clutch assembly is a crucial part of the tricycle's transmission system, allowing the rider to control the transfer of power from the engine to the wheels.

In a tricycle, the clutch assembly is typically located between the engine and the transmission. It consists of several key components, including:

**Clutch Plates:** The clutch plates are a set of alternating friction plates and metal plates.

**Clutch Springs:** The clutch springs apply pressure to the clutch plates, ensuring that they remain engaged when power is being transmitted.

**Clutch Hub:** The clutch hub is a central component that connects the clutch plates to the engine's crankshaft.

**Clutch Basket:** The clutch basket is a housing that encloses the clutch plates and transfers power from the clutch plates to the tricycle's transmission.
