

R1070800 Alloy Motorcycle Moto Center Clutch Assy For TVS ROCKZ 125

Our Product Introduction

Basic Information

- Place of Origin: Guangdong, China
- Brand Name: WAY-C
- Model Number: TVS ROCKZ 125
- Minimum Order Quantity: 100 pieces
- Price: \$5.00/pieces 200-990 pieces
- Packaging Details: Box+CARTON
- Delivery Time: 30-45days
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 10000 Piece/Pieces per Month

Product Specification

- Model: TVS ROCKZ 125
- Product Name: Center Clutch Assy
- MOQ: 100PCS
- Material: Alloy
- Quality: High Quality
- Shipping: Sea Transport.Air Transport Air Express
- Port: NANSHA/HUANGPU, GUANGZHOU
- Parts NO: R1070800
- Highlight: **R1070800 Moto Center Clutch,
Moto Center Clutch Assy,
Alloy Motorcycle Center Clutch**

Product Description

R1070800 Motorcycle Moto Center Clutch Assy for TVS ROCKZ 125

Products Description

Product name	Center Clutch Assy
Model	TVS ROCKZ 125
Materials	Alloy
Parts NO	R1070800
Packing	Box
Shipping	Sea/Air
Place of origin	Guangzhou,China

WAY-C

The motorcycle center clutch assembly, also known as the clutch center or clutch hub assembly, is a critical component of a motorcycle's clutch system. It is responsible for transmitting power from the engine to the transmission by engaging and disengaging the clutch.

The center clutch assembly is typically located in the center of the clutch system, between the engine and the transmission. It consists of several key components, including:

Clutch Hub: The clutch hub is a cylindrical component that connects directly to the engine's crankshaft. It rotates with the engine and transfers the engine's power to the clutch assembly.

Clutch Plates: The clutch plates are a set of alternating friction plates and metal plates. When the clutch is engaged, the friction plates are pressed tightly against each other, allowing power to be transmitted from the engine to the transmission. When the clutch is disengaged, the friction plates separate, interrupting the power flow.

Clutch Springs: The clutch springs provide the necessary pressure to keep the clutch plates engaged. They ensure that the friction plates maintain sufficient contact with each other to transmit power effectively. The springs also allow for some slippage to occur between the plates during clutch engagement, providing a smooth engagement and preventing sudden jerks.

Clutch Center Bearing: The clutch center assembly may also include a bearing that facilitates smooth rotation of the clutch hub. This bearing reduces friction and allows the clutch hub to spin freely.

Why Choose Us

OUR ADVANTAGES

GUANGZHOU WAY-C TRADING CO.,LTD.

Why choose us?

- ◆ 1. High quality: Using high quality material and establishing a strict quality control system, assigning specific persons in charge of each part of production, from raw material purchase to assembly.
- ◆ 2. Professional models for motorcycle parts and three wheeler parts, we have one group to focus on the new models parts, so welcome to OEM and ODM orders
- ◆ 3. Fast dispatch: Most of the products are in stock. Quality below 100pcs can be delivered within 15 days.
- ◆ 4. Small order accepted: Low MOQ accepted. 50pcs are available.
