Product Description

JA621414 Motorcycle Moto One Way Clutch for BAJAJ BOXER BM150

Products Description

Product name	One Way Clutch
Model	BAJAJ BOXER BM150
Materials	Alloy
Parts NO	JA621414
Packing	Box
Shipping	Sea/Air
Place of origin	Guangzhou,China

Motorcycle one-way clutch, also known as a sprag clutch or a freewheel, is a specific type of clutch mechanism used in motorcycles. It is designed to transmit power in one direction while allowing free rotation in the opposite direction.

The one-way clutch is typically located in the transmission system of the motorcycle. It consists of a set of sprags or rollers that engage and disengage with an inner and outer race. When the sprags are engaged, they transmit torque from the input side to the output side of the clutch, allowing the motorcycle to move forward. However, when the rotation direction is reversed, the sprags disengage, allowing the output side to rotate freely without transmitting power back to the input side.
