Product Description

31800H73100H000 Motorcycle Moto Starter Relay for HAOJUE KA150

Products Description

Product name	Starter Relay
Model	TVS HLX
Materials	Plastic
Parts NO	R2160100
Packing	Box
Shipping	Sea/Air
Place of origin	Guangzhou,China

WAY-C

The starter relay in a motorcycle is an electrical component that controls the flow of electrical current from the battery to the starter motor. It serves as a switch that allows high current to be delivered to the starter motor when the ignition is engaged, enabling the engine to start.

When you turn the ignition key or press the start button on a motorcycle with an electric starter, the starter relay receives a signal from the ignition switch or start button. This signal activates the relay, allowing the flow of electrical current from the battery to the starter motor.

The starter relay is typically located near the battery or in the motorcycle's electrical system. It is designed to handle high currents generated by the starter motor during engine cranking. The relay consists of a coil, contacts, and a solenoid.
