Product Description

PF402416 Motorcycle Moto Speedometer With USB For BAJAJ BOXER BM150 5GEAR

Products Description

The PF402416 Plastic Motorcycle Moto Speedometer with USB for Bajaj Boxer BM150 5-Gear is a high-performance digital speedometer designed to provide accurate and real-time data for your motorcycle. Specifically tailored for the Bajaj Boxer BM150 with a 5-gear transmission, this speedometer offers a sleek, modern design combined with advanced functionality. It not only tracks your speed but also provides essential information such as odometer readings, trip meters, and engine performance metrics.

Key Features:

USB Connectivity: Equipped with a USB port, allowing you to connect the device for software updates or additional functionality.

Accurate Display: Provides clear, real-time readings of speed, distance, and more, ensuring you have precise control over your ride.

Durable Construction: Made from high-quality plastic, it's designed to withstand the rigors of daily riding and exposure to various weather conditions.

Easy Installation: Compatible with the Bajaj Boxer BM150, the speedometer is simple to install, requiring minimal setup time. This speedometer enhances your riding experience by offering detailed information and improved functionality. Perfect for daily commuters and long-distance riders alike, the PF402416 is an essential upgrade for your Bajaj Boxer BM150.

Motorcycle speedometer is an instrument on the motorcycle's dashboard that displays the current speed at which the motorcycle is traveling. It provides the rider with essential information about their speed, allowing them to maintain control and comply with speed limits.

Here are some key points regarding motorcycle speedometers:

Display: The speedometer typically features a digital or analog display that shows the speed in either kilometers per hour (km/h) or miles per hour (mph).

Accuracy: Motorcycle speedometers are designed to provide accurate readings, but it's worth noting that they can have a

slight margin of error. It's advisable to periodically calibrate the speedometer to ensure accuracy.

Odometer: Many speedometers also include an odometer, which displays the total distance that the motorcycle has traveled.

Trip Meter: Some speedometers have a trip meter feature that allows riders to track the distance covered during specific trips. It can be manually reset to start counting from zero for each new journey.

Additional Features: Depending on the motorcycle model and brand, speedometers may have additional features such as fuel level indicators, gear position indicators, temperature displays, and warning lights for various functions.

Mounting Location: The speedometer is commonly positioned on the motorcycle's dashboard or instrument cluster, within the rider's line of sight for easy visibility.
