Product Description

24151258 Tricycle TUKTUK Moto MASTER CYLINDER ASSY For BAJAJ RE

Products Description

Product name	Wheel Cylinder Rear
Model	BAJAJ
Materials	Metal
Parts NO	24151164
Packing	Box
Shipping	Sea/Air
Place of origin	Guangzhou,China

WAY-C

A tricycle wheel cylinder is a component of the braking system in a tricycle or three-wheeled vehicle. It is a hydraulic device that helps in the operation of the drum brakes.

Function: The tricycle wheel cylinder is responsible for applying the braking force to the brake shoes inside the brake drum. When the brake pedal is pressed, hydraulic pressure is created, which activates the wheel cylinder. The wheel cylinder then pushes the brake shoes against the brake drum, creating friction and causing the tricycle to slow down or stop.
