14036H2C060H000 Metal Motorcycle Body Parts Exhaust Pipe Muffler For HAOJUE KA150

Our Product Introduction

Basic Information

- Place of Origin: Guangdong, China
- Brand Name: WAY-C
- Model Number: HAOJUE KA150
- Minimum Order Quantity: 50 pieces
- Price: \$15.00/pieces 200-990 pieces
- Packaging Details: Box+CARTON
- Delivery Time: 30-45days
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 20000 Piece/Pieces per Month

Product Specification

- Model: HAOJUE KA150
- Product Name: Exhaust Pipe Muffler
- MOQ: 50PCS
- Material: Metal
- Quality: High Quality
- Shipping: Sea Transport, Air Transport, Air Express
- Port: NANSHA/HUANGPU, GUANGZHOU
- Parts NO: 14036H2C060H000
- Highlight: **14036H2C060H000 Motorcycle Body Parts, Metal Motorcycle Body Parts, Moto Exhaust Pipe Muffler**

Product Description

14036H2C060H000 Motorcycle Exhaust Pipe Muffler for HAOJUE KA150

Products Description

Product name	Motorcycle Muffler
Model	KA150
Materials	Metal
Parts NO	14036H2C060H000
Packing	Box
Shipping	Sea/Air
Place of origin	Guangzhou,China

The motorcycle exhaust pipe is a pipe system through which the engine emits exhaust gas. It plays the role of discharging exhaust gas, improving engine performance and regulating emission noise.

Function: The main function of the motorcycle exhaust pipe is to discharge the exhaust gas produced after combustion from the engine and guide the exhaust gas into the atmosphere through the exhaust pipe system. At the same time, the exhaust pipe also muffles and controls exhaust gas to improve engine performance and reduce noise.

Structure: Motorcycle exhaust pipes usually consist of multiple parts, including the intake pipe, muffler (or muffler) and tail pipe. The intake pipe connects to the engine's exhaust port and directs the exhaust gases into the muffler. The muffler reduces exhaust gas noise through its internal sound insulation materials and design, and silences and controls exhaust gas through a series of pipe and cavity structures. The tailpipe is the end of the exhaust pipe that releases exhaust gases into the atmosphere.
