BAJAJ PULSAR 180 Motorcycle Carburetor DJ121041

Our Product Introduction

Basic Information

- Place of Origin: Guangdong, China
- Brand Name: WAY-C
- Model Number: BAJAJ PULSAR 180
- Minimum Order Quantity: 40 pieces
- Packaging Details: Box+CARTON
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 20000 Piece/Pieces per Month

Product Specification

- Model: BAJAJ PULSAR 180
- Product Name: Carburetor
- MOQ: 40PCS
- Material: Alloy
- Quality: High Quality
- Shipping: Sea Transport, Air Transport, Air Express
- Port: NANSAN/HUANGPU, GUANGZHOU
- Parts NO: DJ121041
- Highlight: **DJ121041 Motorcycle Carburetor,
BAJAJ PULSAR 180 Carburetor,
BAJAJ PULSAR 180 Motorcycle Carburetor**

CARBURETOR PULSAR 180

To better understand, let's discuss what a motorcycle carburetor BAJAJ PULSAR 180 actually is. In the simplest terms, the job of a motorcycle "carburetor" or a series of multiple carburetors is to create a combustible mixture of gasoline and air that powers the engine and creates the driving force that propels the vehicle forward. Carburetors have been updated, modernized, and improved over the years; however, the basic premise of mixing fuel and air has not changed.

How does a carburetor BAJAJ PULSAR 180 work? So, what does a carburetor do? How does a motorcycle carburetor work?

The job of a carburetor is to provide an air/fuel mixture to an internal combustion engine. The carburetor BAJAJ PULSAR 180 regulates the flow of air through the main bore (the flow of air sucks in fuel, and the mixture enters the engine through the intake valves). The carburetor consists of a bowl, center bore, passages, jets, vents, slides, enricher (aka choke), idle speed adjustment, air/fuel ratio adjustment, and usually an accelerator pump.
