WAY-C TUKTUK KEKE Parts G2100010 Rear Shock Absorber TVS KING

Our Product Introduction

Basic Information

- Place of Origin: Guangdong, China
- Brand Name: WAY-C
- Model Number: TVS KING
- Minimum Order Quantity: 50 Set
- Packaging Details: Box+Carton
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 200000 Piece/Pieces per Month

Product Specification

- Model: TVS KING
- Product Name: Rear Shock Absorber
- MOQ: 50 PCS
- Material: Alloy
- Quality: High Quality
- Shipping: Sea Transport, Air Transport, Air Express
- Port: NANSHA/HUANGPU, GUANGZHOU
- Parts NO: G2100010
- Highlight: G2100010 Rear Shock Absorber, TVS KING Rear Shock Absorber

Product Description

WAY-C TUKTUK KEKE Parts G2100010 Rear Shock Absorber TVS KING

Products Description

The WAY - C G2100010 Rear Shock Absorber is an essential component for TVS KING TUKTUKs and KEKEs, playing a pivotal role in ensuring a smooth and comfortable ride.

This shock absorber is engineered to handle the rugged terrains that these three - wheelers often encounter. It features a durable steel body, which can withstand the impacts and vibrations during operation. The internal damping mechanism is designed to control the movement of the rear suspension effectively. It reduces the harshness of bumps and potholes, providing stability and minimizing the wear and tear on other vehicle components.

Production Steps

1. **Material Preparation:** High - strength steel is sourced for the outer body. The steel is carefully selected based on its mechanical properties, ensuring it can endure the stress during use.
2. **Cylindrical Body Forming:** The steel is formed into a cylindrical shape through a precision - controlled cold - rolling or forging process. This step gives the shock absorber its basic structure.
3. **Damping System Assembly:** The internal damping components, such as the piston, valves, and hydraulic fluid, are assembled with utmost precision. The piston design is crucial as it determines the damping force. The valves are calibrated to regulate the flow of the hydraulic fluid, which in turn controls the shock - absorbing effect.
4. **Quality Testing:** Each completed shock absorber undergoes rigorous quality checks. This includes performance tests under simulated real - world conditions to ensure it meets the required standards for TVS KING vehicles, guaranteeing reliable and long - lasting performance.

Product name	Rear Shock Absorber
Model	TVS KING
Parts NO	G2100010
Packing	Box
Shipping	Sea/Air
Place of origin	Guangzhou, China

REAR SHOCK ABSORBER TVS KING

NO C216 Baiyun Motorcycle Parts Market
Baiyun District Guangzhou China

A motorcycle rear shock absorber is a device used to reduce shock and vibration to the rear suspension system during motorcycle riding. It acts to absorb and regulate impact forces from road irregularities, bumps or jumps, providing a smoother and more comfortable ride.

The rear shock absorber usually consists of a pneumatic shock absorber or a hydraulic shock absorber, which absorbs impact by compressing gas or liquid, and uses a damping adjuster to control the speed and amplitude of shock absorption.

The main components of the rear shock absorber include:

Shock-absorbing spring: It is responsible for supporting and restoring the rear suspension system, absorbing and dispersing energy when encountering impacts.

Shock Absorber Cylinder: The main part that houses the shock absorber, usually a pneumatic shock absorber or a hydraulic shock absorber.

Damping adjuster: Controls the speed and amplitude of shock absorption by adjusting the damping force inside the shock absorber.

Adjustments: Some rear shocks are adjustable, allowing the rider to tailor the damping to road conditions or personal preference.

The design and adjustment of the rear shock absorber is crucial to the suspension performance and ride comfort of a motorcycle.

PACKING & SHIPPING

GUANGZHOU WAY-C TRADING CO.,LTD.

5-7 working days

Why choose us?

- ◆ 1. High quality: Using high quality material and establishing a strict quality control system, assigning specific persons in charge of each part of production, from raw material purchase to assembly.
- ◆ 2. Professional models for motorcycle parts and three wheeler parts , we have one group to focus on the new models parts , so welcome to OEM and ODM orders
- ◆ 3. Fast dispatch: Most of the products are in stock. Quality below 100pcs can be delivered within 15 days.
- ◆ 4. Small order accepted: Low MOQ accepted. 50pcs are available.
