G4010170 Tricycle TUKTUK KEKE Cylinder Block Piston Complet TVS KING

Our Product Introduction

for more products please visit us on waycmoto.com

Basic Information

- Place of Origin: Guangdong, China
- Brand Name: WAY-C
- Model Number: TVS KING
- Minimum Order Quantity: 36 pieces
- Packaging Details: Box+CARTON
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 20000 Piece/Pieces per Month

Product Specification

- Model: TVS KING
- Product Name: Cylinder Block Kit
- MOQ: 36PCS
- Material: Iron
- Quality: High Qaulity
- Shipping: Sea Transport.Air Transport Air Express
- Port: NANSHA/HUANGPU, GUANGZHOU
- Parts NO: G4010170
- Highlight: KEKE Cylinder Block Piston, TVS KING Cylinder Block Piston, Tricycle Cylinder Block Piston

Product Description

G4010170 Tricycle TUKTUK KEKE Cylinder Block Piston Complet TVS KING

Products Description

The G4010170 Cylinder Block Piston Complet for TVS KING tricycles, also known as TUKTUK or KEKE, is a crucial component set that ensures the smooth and efficient operation of these popular three - wheelers.

Exceptional Features

1. **High - Quality Materials:** Constructed from top - grade cast iron for the cylinder block and lightweight, yet durable aluminum alloy for the piston. The cast iron cylinder block provides excellent heat dissipation and wear resistance, ensuring long - term reliability even under harsh operating conditions. The aluminum alloy piston, on the other hand, reduces reciprocating mass, which in turn improves engine efficiency and fuel economy.
2. **Precision Engineering:** Engineered with tight tolerances, every part of this set fits perfectly. This precision minimizes engine vibrations, noise, and oil consumption. It also contributes to better combustion efficiency, resulting in increased power output and reduced emissions.

Manufacturing Process

1. **Casting:** The production begins with the casting of the cylinder block. Molten cast iron is poured into a carefully crafted mold. This mold is designed to give the cylinder block its complex shape, including the cylinder bores, coolant passages, and oil galleries. The casting process is closely monitored to ensure uniform density and no internal defects.
2. **Machining:** After casting, the cylinder block undergoes a series of machining operations. The cylinder bores are precision - honed to achieve the exact required diameter and surface finish. This ensures a perfect fit with the piston rings, reducing blow - by and maximizing engine performance.
3. **Piston Manufacturing:** The piston is formed through a forging process using aluminum alloy. Forging enhances the material's strength and grain structure. After forging, the piston is machined to the precise dimensions, with grooves for the piston rings and a carefully designed skirt profile to reduce friction.
4. **Assembly:** Finally, the cylinder block and piston are assembled with high - quality piston rings, gudgeon pins, and other necessary components. Each assembled unit is thoroughly inspected to meet the strict quality standards, guaranteeing a reliable product for TVS KING tricycle owners.

Product name	Cylinder Block Kit
Model	TVS KING
Materials	Iron
Parts NO	G4010170
Packing	Box
Shipping	Sea/Air
Place of origin	Guangzhou,China

CYLINDER KIT TVS KING

NO C216 Baiyun Motorcycle Parts Market
Baiyun District Guangzhou China

TUKTUK TVS KING is a motorcycle model, and "cylinder block kit" refers to the cylinder block assembly kit of a motorcycle. The cylinder block is an important part of the engine, it houses the piston and cylinder liner, provides space for compression, and generates power through the up-and-down movement of the piston.

Engine Technology: The TUKTUK TVS KING features advanced engine technology for efficient combustion efficiency and excellent fuel economy. The model may feature a specific cylinder head design, variable valve timing, or other innovative technologies to provide enhanced power delivery and lower emission levels.

PACKING & SHIPPING

GUANGZHOU WAY-C TRADING CO.,LTD.

Why Choose Us

Why choose us?

- ◆ 1. High quality: Using high quality material and establishing a strict quality control system, assigning specific persons in charge of each part of production, from raw material purchase to assembly.
- ◆ 2. Professional models for motorcycle parts and three wheeler parts , we have one group to focus on the new models parts , so welcome to OEM and ODM orders
- ◆ 3. Fast dispatch: Most of the products are in stock. Quality below 100pcs can be delivered within 15 days.
- ◆ 4. Small order accepted: Low MOQ accepted. 50pcs are available.
