G4321290 TUKTUK Tricycle Con Rod Kit Connecting Rod Kit For TVS KING

Our Product Introduction

Basic Information

- Place of Origin: Guangdong, China
- Brand Name: WAY-C
- Model Number: TVS KING
- Minimum Order Quantity: 100 pieces
- Packaging Details: Box+CARTON
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 20000 Piece/Pieces per Month

Product Specification

- Model: TVS KING
- Product Name: Connecting Rod
- MOQ: 60SET
- Material: Iron
- Quality: High Quality
- Shipping: Sea Transport, Air Transport, Air Express
- Port: NANSHA/HUANGPU, GUANGZHOU
- Parts NO: G4321290
- Highlight: TUKTUK Tricycle Con Rod Kit,
G4321290 Tricycle Con Rod Kit

Product Description

G4321290 TUKTUK Tricycle Con Rod Kit Connecting Rod Kit For TVS KING

Products Description

The G4321290 TUKTUK Tricycle Con Rod Kit is a premium-quality connecting rod kit designed specifically for the TVS KING three-wheeler. This kit includes essential components like the connecting rod, bearings, and hardware, all precision-engineered to ensure optimal engine performance. The connecting rod is a vital component that connects the piston to the crankshaft, transferring the force generated by the piston into rotational motion, which powers the vehicle. Made from high-strength materials, the G4321290 kit is designed to withstand high stress and heat, ensuring long-lasting durability and smooth operation.

Features:

High-Strength Construction: The connecting rod is made from durable steel alloys that can endure the high forces and temperatures typically generated by engine operation.

Precision Machining: Each part of the kit is precision-machined to ensure proper fit and function, ensuring smooth engine performance and minimal wear.

Enhanced Durability: The components are designed for high resistance to wear, corrosion, and fatigue, extending the life of the engine.

Complete Kit: The G4321290 kit includes all necessary components, making it easy for mechanics to replace or upgrade the connecting rod system in the TVS KING.

Manufacturing Process: The production of the connecting rod kit begins with the careful selection of high-quality materials. These components are then machined using advanced technology to ensure accuracy and strength. Each connecting rod is carefully tested for structural integrity and performance before being assembled with other components in the kit. The final product undergoes rigorous quality checks to ensure it meets OEM standards, providing reliable performance for the TVS KING tricycle.

This Con Rod Kit is essential for maintaining engine efficiency, power output, and overall vehicle performance.

Product name	Connecting Rod
Model	TVS KING
Materials	Iron
Parts NO	G4321290
Packing	Box
Shipping	Sea/Air
Place of origin	Guangzhou, China

Baiyun District Guangzhou China

G4321290 TUKTUK Tricycle TVS KING connecting rods are an important part of connecting the engine crankshaft and pistons. It is also known as a connecting rod assembly or connecting rod assembly. The main function of the connecting rod is to convert the rotational motion of the crankshaft into reciprocating linear motion and transmit power to the pistons to drive the wheels of the tricycle.

G4321290 TUKTUK Tricycle TVS KING connecting rods are usually made of high-strength metal materials, such as steel alloys or aluminum alloys. It has a small end connected to the crankshaft and a large end connected to the piston. The small end is connected to the crankshaft through pins or bolts, and the big end is connected to the piston through pins or sliding bearings.

When the engine is running, the rotational motion of the crankshaft is transmitted to the small end of the connecting rod, causing the connecting rod to swing. This creates reciprocating linear motion between the big end of the connecting rod and the piston. The reciprocating motion of the piston in the cylinder produces cylinder compression and explosion impact, which drives the crankshaft to rotate and further transmits power to the motorcycle's transmission system, thereby driving the wheels to rotate.

G4321290 TUKTUK Tricycle TVS KING connecting rod designs and specifications will vary based on different engine types and motorcycle applications. High-performance motorcycles often require stronger and more durable connecting rods to handle higher power and rpm. In addition, the weight and balance of the connecting rod also have an important impact on the balance and vibration control of the engine.

G4321290 TUKTUK Tricycle TVS KING connecting rods bear tremendous force and pressure during engine operation, so it is important to regularly check and maintain the condition of the connecting rods. If the connecting rod is damaged, deformed or worn, it may result in reduced engine performance or even serious failure.

PACKING & SHIPPING

GUANGZHOU WAY-C TRADING CO.,LTD.

Why Choose Us

Why choose us?

- ◆ 1. High quality: Using high quality material and establishing a strict quality control system, assigning specific persons in charge of each part of production, from raw material purchase to assembly.
- ◆ 2. Professional models for motorcycle parts and three wheeler parts , we have one group to focus on the new models parts , so welcome to OEM and ODM orders
- ◆ 3. Fast dispatch: Most of the products are in stock. Quality below 100pcs can be delivered within 15 days.
- ◆ 4. Small order accepted: Low MOQ accepted. 50pcs are available.
