Product Description

WAY-C 13101-KYY-900 Motorcycle Spare Parts Piston Ring ACE CB125

Products Description

The 13101-KYY-900 Piston and Piston Ring set is a critical component for Motorcycle ACE CB125, ensuring optimal engine performance.

The piston is crafted from high - quality aluminum alloy, offering a perfect balance of light weight and durability. This reduces the engine's reciprocating mass, enhancing fuel efficiency and power output. The piston rings, made of resilient cast iron, provide an excellent seal between the piston and the cylinder wall, preventing gas leakage and ensuring efficient combustion.

During production, the piston is first forged to achieve its basic shape, enhancing material strength. Then, it undergoes precision machining to meet tight tolerances. Piston rings are formed by casting, followed by grinding and lapping processes to ensure a proper fit and consistent sealing performance. Rigorous quality checks are carried out at every step to guarantee top - notch quality for reliable engine operation.
