## WAY-C MOTORCYCLE PF581012 BOXER BM150 AIR FILTER ELEMENT

Our Product Introduction

### Basic Information

- Place of Origin: Guangdong, China
- Brand Name: WAY-C
- Model Number: BM150
- Minimum Order Quantity: 500 pieces
- Packaging Details: Box+CARTON
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 200000 Piece/Pieces per Month

### Product Specification

- Model: BM150
- Product Name: AIR FILTER ELEMENT
- MOQ: 500SET
- Material: SPONGE
- Quality: High Qaulity
- Shipping: Sea Transport.Air Transport Air Express
- Port: NANSHA/HUANGPU, GUANGZHOU
- Parts NO: PF581012
- Highlight: PF581012 AIR FILTER ELEMENT,  
BM150 AIR FILTER ELEMENT,  
WAY-C AIR FILTER ELEMENT

Zengcha Road Baiyun  
District Guangzhou,China

The motorcycle oil filter is used to filter the oil circulating inside the engine to remove impurities and contaminants, keep the oil clean and protect the key components of the engine. It is an important part of the motorcycle engine lubrication system.

Oil filters usually consist of a metal housing and filter element. The metal casing is usually installed on the engine and has an oil inlet and an oil outlet. The filter element is located inside the housing and is responsible for filtering the engine oil. The filter element is usually made of fiber material with tiny pores and filter media, which can prevent solid particles, contaminants and metal shavings from entering the oil circulation system.

When the engine is running, the oil pump pumps oil to the oil filter. The oil passes through the filter element, and the impurities and pollutants in it are captured by the filter element. Only clean oil returns to the engine through the filter element to lubricate and cool key components such as pistons, crankshafts, etc. In this way, the oil filter protects the engine from damage by particles and contaminants and extends the life of the oil.

Oil filter maintenance is important, and regular oil filter replacement is a key step in keeping your engine working well. The life of the oil filter depends on usage conditions and mileage, and it is generally recommended to replace it regularly according to the manufacturer's recommendations. When replacing the oil filter, choose the appropriate filter that matches the make and model of your motorcycle and ensure it is installed correctly.

In summary, the motorcycle oil filter is an important component in the engine lubrication system. It filters the oil to remove impurities and pollutants and protects key engine components from damage. Regularly changing your oil filter is an important step in maintaining engine performance and life.
